

Job Title: Research technician

A research technician position is open in our laboratory at San Raffaele Telethon Institute for Gene Therapy (SR-TIGET).

Job description:

The candidate will work under the supervision of a senior post-doc on a project aimed to characterize the bone marrow niche, with particular attention to the role of mesenchymal stromal cells in maintaining primitive HSCs and promoting their engraftment.

We are looking for highly-motivated and enthusiastic candidate with a strong propensity to team working. The candidate must have experience in cell culture, RNA isolation, RT-qPCR. Additional experience in flow cytometry will be considered as a plus. The successful candidate will have the opportunity to work in a challenging environment strongly dedicated to translational medicine.

Salary according to experience and profile. Starting date February 2018

Both graduate students (with at least 1 year of experience) and laboratory technician are encouraged to apply by providing the following documentation. Please send your application including CV, e-mail and phone number to:
