

POST-DOCTORAL POSITION

A post-doctoral fellowship is immediately available at the **Mechanisms of Peripheral Tolerance Unit** at the San Raffaele Telethon Institute for Gene Therapy (SR-TIGET), San Raffaele Scientific Institute, Milan, Italy.

We are looking for a highly motivated junior post-doc with previous expertise in human immunology, and preferably experience with small animal models, to undertake a challenging project focused on leukemia T cell immunotherapy.

The successful candidate will work in a stimulating environment in close collaboration with researchers skilled in human and mouse immunology, autoimmune disease and gene therapy pre-clinical models, epigenetics and molecular biology.

Please send a CV, a one-page statement of research interest and contact information for one/two referees Silvia Gregori at gregori.silvia@hsr.it

Applications should be sent before July 30th, 2017
